# THE HOME OF *CORGI* TOYS

Your Corgi Toys are made at the huge twin factories of Playcraft Toys Ltd. and the Mettoy Co. Ltd. illustrated on this page, which are situated in Swansea, South Wales.

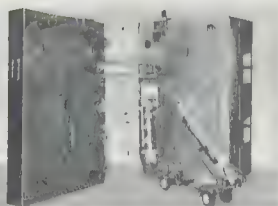

The manufacture of Corgi models is carried out under the experienced eyes of the most skilful engineers in die-cast modelling—your models receive the same precise care and attention to detail which is found in a real car factory, and go through many of the processes used in the production of actual cars. Pictured below are some of the stages in the manufacture of Corgi Toys.

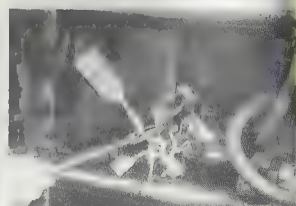

Checking dimensions of a new model with a micrometer against the drawings.

A wooden mock-up, a sectioned pre-production casting and a painted pilot model.

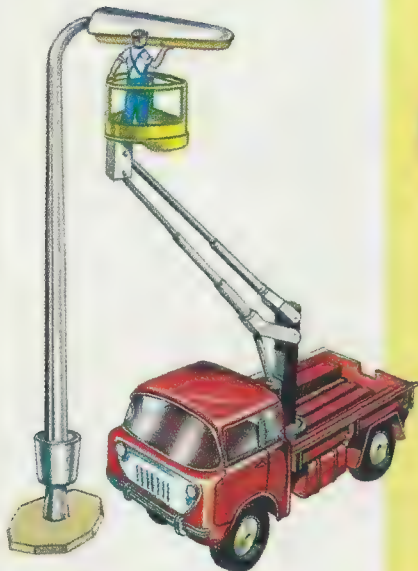

Castings for a Corporal Guided Missile (complete model shown in foreground) and the complicated mould from which they were produced.

Castings being pulled from a Mettoy built die-casting machine.

Only the very finest materials and processes are used in the manufacture of Corgi Toys, these being subject to regular sampling and analytical control by the British Standards Institution.

## —the precision die-cast scale models with the all-star finish

The diagram shows many of the features which appear in Corgi Toys—not all of them, of course, in any one particular model. Those features marked with a star were first introduced by Corgi.

- 1 Jewelled head lights
- 2 Plated grille and bumpers
- 3 Opening bonnet revealing detailed engine
- 4 Steering wheel
- 5 Windows
- 6 Seats and internal panelling
- 7 Venetian blind
- 8 Opening boot revealing rear engine
- 9 Opening boot revealing spare wheel
- 10 Ruby rear lights
- 11 Self-adhesive accessories
- 12 Engine under automatically opening bonnet
- 13 Castored steering —self-centring
- 14 Glidamatic spring suspension
- 15 Two-tone colouring

Interior of a fettling barrel in which castings lose their rough edges.

Painted models emerging from the stoving oven.

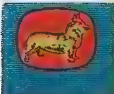

The finished product—a Ford Consul Classic 315 from the end of the assembly line.

Now ready for despatch in its distinctive blue and yellow carton.

In certain instances where it is unsatisfactory to die-cast in mazak alloy, materials of the highest quality are chosen — for example, nylon is used for the cage of the Hydraulic Tower Wagon.
